Consultation Client Testimonial

“I loved working with Jeanne as the remote design expert I needed to help me finish my construction project. She helped me to make the decisions I was struggling with and to pull the rooms together, so they looked decorated, finished, and flowed within my home.

I was able to leverage her design expertise to decide on lighting and furniture, pick a color palette, help me with shelf styling, accessories, and suggestions for furniture layouts for our family room.

I didn't have a large enough project to hire a full-service designer, so being able to tap into Jeanne's incredible design experience was a gift.

I love the finished spaces!”
